الدرس دا عبــاره عن تطبيق عملــى علــى ال if condition وبــعد ال methods وال
formatting اللى اخدنــاهم فى الدروس اللى فاتت، هو عبــاره عن تطبيق لمثال حساب
العمر بس المرادى بخلى المستخدم يدخل عمره ك input ويختار ال unit اللى عايز
يحسب بيها سواء شهور او اسابيع او ايام.

```python
# -----------------------------------------------
# -- Calculate Age Advanced Version and Training --
# -----------------------------------------------

# Write A Very Beautiful Note
print("#" * 80)
print(" You Can Write The First Letter Or Full Name of The Time Unit ".center(80, '#'))
print("#" * 80)

# Collect Age Data
age = input("Please Write Your Age: ").strip()

# Collect Time Unit Data
unit = input("Please Choose Time Unit: Months, Weeks, Days\n ").strip().lower()

# Get Time Units
months = int(age) * 12
weeks = months * 4
days = int(age) * 365

if unit == 'months' or unit == 'm':

  print("You Choosed The Unit Months")
  print(f"You Lived For {months:,} Months.")

elif unit == 'weeks' or unit == 'w':

  print("You Choosed The Unit Weeks")
  print(f"You Lived For {weeks:,} Weeks.")

elif unit == 'days' or unit == 'd':

  print("You Choosed The Unit Days")
  print(f"You Lived For {days:,} Days.")
```

CODE

```
exe "c:/Users/Muhammad/Documents/Python Course/first.py"
################################################################################
######### You Can Write The First Letter Or Full Name of The Time Unit #########
################################################################################
Please Write Your Age: 22
Please Choose Time Unit: Months, Weeks, Days => d
You Choosed The Unit Days
You Lived For 8,030 Days.
```

OUTPUT
